# LED Blink using NodeMCU/Arduino Uno

NodeMCU:

```
void setup () {
pinMode(D0,OUTPUT);
}
void loop() {
digitalWrite(D0,HIGH);
delay(2000);
digitalWrite(D0,LOW);
delay(2000);
}
```

Arduino:

```
void setup() {
  pinMode(13, OUTPUT);
}

void loop() {
  digitalWrite(13, HIGH);
  delay(2000);
  digitalWrite(13, LOW);
  delay(2000);
}
```

For Node: +5V to VU; GND to G; LED1 to D0
For Arduino: +5V to +5V; GND to GND; Pin 13 to LED1
